

6. Which of the following shows a linear function that does not have the same  $y$ -intercept as each of the other linear functions shown?

A.

C.

B.

D.

7. The formula  $a = \frac{1}{2}rp$  describes the relationship of the area of a regular polygon,  $a$ , to the length of its apothem,  $r$ , and perimeter,  $p$ . Which describes the relationship of the apothem of a regular polygon to its area and perimeter?

A.  $r = \frac{1}{2}ap$

B.  $r = \frac{a}{2p}$

C.  $r = 2ap$

D.  $r = \frac{2a}{p}$
