

9. While playing a board game that uses a spinner to determine the number of spaces that a game piece may advance, Herschel and Leah kept count of the number of times that the spinner landed on each number. They made the following chart during the game.

Spin Frequency

Spinner Space	Number of Times
1	5
2	1
3	3
4	2
5	7
6	3
7	5
8	2

Which dot plot best represents the distribution of spin results during the game?
